The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose, either singly or in combination, a scanning optical microscope which scans a sample with a laser beam from a laser source comprising a spectral resolving unit which resolves fluorescent rays from the sample into successive spectral components; a wavelength splitter which splits the successive spectral components resolved by the spectral resolving unit into rays of a plurality of different wavelengths and a plurality of side-on type photomultipliers, wherein axial centers of the photomultipliers come approximately within planes to be spectrally-resolved by the spectral resolving unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
